

STOBER

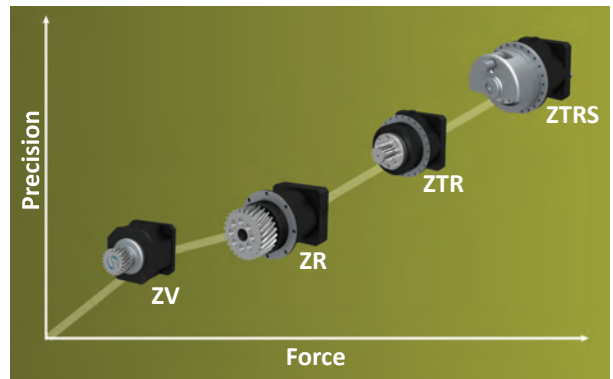

RACK AND PINION

From high speed to high force, flange to shaft, STOBER has the options you need, especially when it comes to rack and pinion drives. Every rack and pinion system uses STOBER's superior servo gearboxes and can be made into a system with a motor. The versatility of our rack and pinion drive systems makes them indispensable across a broad spectrum of industries.

Benefits include:

- High speed or high force options
- Reduced backlash
- Simple installation process
- Available as gearbox or compact servo geared motor

NEW ZS RACK

FEATURES

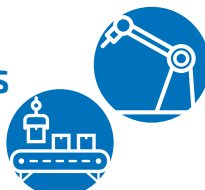

- Fastening bores every 62.5mm
- Hardened helical racks

OPTIONS

- ½-meter, 1 and 2 meter lengths
- Companion rack
- Lubrication kit

IDEAL APPLICATIONS

- Laser cutting
- Pick and place

OPTIMIZE WITHOUT COMPROMISE

The new ZS Rack has it all - exceptional STOBER Quality, extraordinary engineering support, and fast delivery!

THE POWER OF ONE

Get the rack, pinion, gearbox, motor, lubrication kit and companion rack all from one source: STOBER!

SAFETY FIRST

The new STOBER ZS rack features double the number of installation bores to speed up installation without pinning and safely transmit the required torque loads.

STOBER HAS YOUR BACK

Use our configurator to quickly build what you need or let our engineers be a trusted extension of your engineering team!
