

# STÖBER

# INTRODUCING THE NEW GENERATION KS

## MORE THAN DOUBLE THE RATIOS

Crush constraints with more than double the ratio options. Dial in speed and torque exactly the way you want.

## MAXIMUM MECHANICAL FLEXIBILITY

Three output options, zero integration headaches! Whatever your machine needs, the KS can cleanly snap into any setup. No redesign, no wasted time.

## BRING THE SPEED

Up to 8,000 RPM! With increased speeds, the new generation KS enables faster cycle times and higher throughput without sacrificing reliability.

## ULTRA-COMPACT FOOTPRINT

The new generation KS delivers more capability in less space. The compact design allows for more compact machine designs and easier integration into space-restricted environments.

## ALL IN ONE

Build a complete system with STÖBER gearbox, motor, and rack! Pair the KS with a STÖBER EZ motor, ZS rack and ZV pinion for a fully engineered, unified solution.

## AVAILABLE AS GEARED MOTOR OR RACK AND PINION

### FEATURES

- Ratios: 2-400
- Acceleration Torque: 32-400Nm
- Continuous Input Speed: Up to 6,000 RPM
- Cyclic Input Speed: Up to 8,000 RPM

### OPTIONS

- Pair with STÖBER EZ motor or rack and pinion
- Three output options – flange, hollow bore, and shaft
- Large input adapter option to accommodate larger diameter motor shafts without upsizing to a larger gearbox
