

## POSITool V 5.7-C

This release is a product update and includes general optimizations for the firmware.

- **Motor library for asynchronous motors IE3**

Thanks to the new motor library, you can now conveniently configure IE3 asynchronous motors in POSITool with just a few clicks.

- **Optimized backward compatibility**

You can now set whether you use synchronous servo motors without field weakening, with controlled field weakening or with regulated field weakening (parameter B91).
