

HOLD UP!

cLEAN System now comes with a brake!

The cLEAN System just got better. Our new integrated holding brake option delivers powerful holding force, unmatched reliability and minimal footprint while maintaining the hygienic IP69K design and 3-year warranty the cLEAN System is known for. It adds high-value capability without adding complexity — proving that when it comes to uptime and performance, this motor isn't just built to move ... it's built to hold the lead as the best motor for washdown applications.

**30%
SHORTER
THAN THE
COMPETITION**

Power Off Permanent Magnet Brake
Power: 24VDC, 1A
Holding Torque: 15Nm

By engineering the brake directly into the cLEAN Motor's compact housing, we eliminate bulky add-ons and preserve the sealing elements maintaining the robust IP69K rating — brake exclusively available in the right-angle option.

Durable, Fast, and Less Complex
B10 = 10 million operations
Release Time: 60ms
Engaging Time: 30ms

By letting the drive power and command the brake directly, the cLEAN Motor turns what used to be a tangle of extra cables into a seamless, single-source solution — cutting complexity and accelerating installation.
