

STÖBER

THE PACKAGED UNIT SOLUTION

STÖBER synchronous servo geared motors are a fully integrated, packaged-unit solution designed to help you get up and running faster than ever.

THE RIGHT TOOL FOR THE JOB

Ingress protection is essential in many geared motor applications. Traditional motor faces often leave gaps that expose components to dust, moisture, and other environmental risks. The result? Increased maintenance, unexpected failures, and costly downtime.

STÖBER eliminates these challenges with optimized geared motor architecture. The motor and gearbox fit together seamlessly, created a unified housing with no exposed faces or leak paths. This fully integrated design ensures complete ingress protection and long-term reliability in demanding environments.

Benefits of STÖBER Geared Motor

- NO Maintenance Necessary
- Ease of installation
- Compact Design
- Arrives Plug N' Play

WHY STÖBER LEADS IN INGRESS PROTECTION

- 100% sealed housing: Motor matches gearbox housing
- No exposed faces to invite contaminants
- Single-source solution: Simplified ordering, installation, and support

COMPETITOR VS STÖBER

Only 2mm of overlap

Many competitor designs typically offer minimal ingress protection because their motor faces only overlap slightly with the gearbox, leaving gaps for contaminants to enter.

STÖBER's packaged units eliminate these vulnerabilities with a tight, continuous seal—ensuring superior protection.

Complete overlap

STÖBER

Our Three Pillars

STOBER is your **trusted partner** in providing the ultimate customer experience. From unsurpassed quality to rapid response support to fast delivery, we are the **gold standard** for gearboxes.

With the new STOBER Configurator, engineers and designers will save time in product selection and designing. Everything is a simple click away!

24/7 Support
Built in less than 1 week

Aftermarket Repair and Replacement done in USA

Committed to **optimizing your production** and machine design
