NEW STÖBER STABILIZING BRACKET

Tired of repeatedly replacing the same failing gearbox? Struggling to find a solution that bolts in place? Frustrated by waiting for someone to weld a mounting bracket? STÖBER can eliminate all these issues with our newly-developed Stabilizer Bracket!

STÖBER's Stabilizer Bracket works in conjunction with a four-bolt (207 or 208) Flanged Bearing and a KSS Tear Drop Torque Arm. Removing any weldment needs, the Stabilizer Bracket makes an extended shaft the only requirement to switch to STÖBER if moving to wobble free bushing.

A great retrofit for current equipment, the Stabilizer Bracket eliminates the need for fabrication or welding—just drop a KSS into any shaft-mounted reducer using a four-bolt flange.

AND SAVES
TIME**

KIT PART NUMBERS

CS137366 (207 Flanged Bearing)

CS137367 (208 Flanged Bearing)

*This is great for retrofits of
customer's current equipment.*

**NO WELDING
NO FABRICATION**

"This will save 30 minutes on install time." -Maintenance Manager

STÖBER

Our Three Pillars

STÖBER is your **trusted partner** in providing the ultimate customer experience. From unsurpassed quality to rapid response support to fast delivery, we are the **gold standard** for gearboxes.

STÖBER 
CONFIGURATOR

With the new STÖBER Configurator, engineers and designers will save time in product selection and designing. Everything is a simple click away!

World's Toughest Gearbox
Best components and quality

Quick Delivery
Build & Ship in 1 Day

24/7, 365 Support
Real people all the time

9.1 YEARS

Average mean time to failure for STÖBER gearboxes in 24/7 harsh environment application.

Asset reliability means you can depend on a STÖBER gear reducer for years, increasing profits and surpassing plant efficiency and targets.
