

## STOBER provides Solutions

Integration of STOBER  
geared and non-geared  
synchronous servo motors  
with third-party systems

## Are you seeking for high performance motors and geared motors for your application?

No problem. We offer our motors with a variety of encoders ready for connection for drive controller systems from other manufacturers.

Modular design and the large number of variations offer extensive opportunities for customized, compact synchronous servo (geared) motors.

### The advantages:

- Maximum torque from the available volume / high torque to volume ratio.
- Excellent dynamic characteristics for maximum machine cycle performance.
- Precise speed control.

## Are you in the market for a complete STÖBER drive solution with advanced electronics?

### No problem, just call on us.

STÖBER drive controllers can be used to perfectly fine tune the individual components of a servo axis to your application.

A system solution from STÖBER carries long-term cost reduction advantages.

Complete STÖBER solution for a multi-axis solution.

SD6 drive controller and MC6 motion controller (panel/pc version) for CODESYS programming software.
